

## Idea/Approach Details

Ministry Category : Hardware

Problem Statement : Develop web/app to assist farmers regarding fruits and vegetables.

Team Leader Name : Bhavin Pindoria

Problem Code :

College Code : 067

Development of android app/website to give farmers a end to get updated for their vegetables and fruits stored in cold storage and to create environment to deliver farmer's fruits and vegetables to the selling yards.

Web development and app development using html and android studio, etc.

# Idea / Approach details

Web/app is developed to connect farmer with transport facilities that directly connected to marketing yards where it can sold vegetable and fruit by use of digital and mechanical services.

Identity of farmer whenever needed used like kisan card and aadhar card. Cold storage is developed within area to connect farms as during the period of calling the collection of vegetable it will remain fresh. The selling amount of fruits and vegetables is directly sent to the farmer a/c after deliver to the yard.

Man power as farmer to identify its own product .  
Smartphone with internet enabled.
